

IT Security Policy

1. Password Requirements

All employees must use a password that is at least 10 characters long, including one uppercase letter, one number, and one special character. Passwords must be changed every 90 days. Reusing the last 5 passwords is not allowed.

2 - Device Encryption

- All laptops issued by the company must have full-disk encryption enabled.
- Personal devices used for work (BYOD) must install the MobileIron MDM agent.
- * USB storage devices are restricted unless approved by IT Security.

Incident Reporting

Any suspected security incident (lost device, phishing email, suspicious login) must be reported to security@company.com within 2 hours of discovery. IT Security will respond within 4 business hours for high severity incidents.

Acceptable Use

Company systems are for business use. Limited personal use is tolerated as long as it does not interfere with work, consume excessive bandwidth, or violate any other company policy.
